

Fitter/Welder

Seeking a motivated, self-starter candidate with at least 5 years' fabrication shop experience and is proficient in reading NAVSEA drawings and other blueprints. Must have experience with carbon steel and cress fabrication standards such as MIL-STD-1688/89, Tech Pub 248/278 and the PPD Basics such as being able to read a tape measurer, understand basic geometry and fabrication tolerances. Must have the ability to fabricate fixtures and templates based on individual's job assessment. Must be able to follow instructions and directions using daily job assignment goal sheets, with accuracy and work with minimal supervision. Must be a team player who can lend their capabilities to improve any and all facets in a Heavy Fabrication Department while maintaining the four cornerstones of production: safety, quality, cost, and schedule.

Must be a U.S Citizen
